

Beach Access Guiding Principles

February 6, 2019

Beach Access and Dune Protection Plan Review Ad Hoc Committee

Beach Access Plan Review Workflow

Committee and Stakeholder Input

1. Finish collecting input from committee
2. Town Hall Meeting #1 with Stakeholders
3. Workshop with City Council in December/January
4. Consider and Incorporate Stakeholder and Council Input

Draft Plan Preparation & Review

5. Staff prepare a Draft Plan
(Ad Hoc Committee beings review of Dune Protection Standards)
6. Staff bring Draft Plan back to committee to review
7. Town Hall Meeting #2 with Stakeholders
 - a. Discussion with Subdivisions, Property Owners' Associations, Developers
 - b. Consider and Incorporate Stakeholder Input

Final Draft of Plan

8. Revise and Refine, Prepare Final Draft of Plan
9. Review Final Draft with Committee
 - a. Committee and Staff to Prepare Implementation Plan, to Prioritize Implementation of Recommendations.
10. Present Final Draft to Planning Commission and City Council

Guiding Principles

Beach Access Guiding Principles in accordance with the Open Beaches Act

- Free and unrestricted beach access should be available to the citizens of Texas, meeting or exceeding the Open Beaches Act standards.
- Promote diversity of uses in a safe and sustainable manner.
- Ensure the integrity and sustainability of the natural system and resources.
- Respect and recognize the rights of adjacent private property.
- Meet the GLO's accessibility (ADA) guidelines.
- Encourage beach patrons to utilize beach access points with amenities.
- Provide consistent, clear, and adequate signage.

Action Items

1. Vehicular Access and Parking
2. Signage and Wayfinding
3. Improvement of Access Points
4. Preservation of Natural Resources

1. Vehicular Access and Parking:

- a) Explore opportunities, where feasible, to relocate on-beach vehicular access to off-beach parking locations.
- b) Locate parking in areas that minimize traffic and safety hazards when locating off-beach parking on neighborhood streets.
- c) Meet or exceed the GLO's accessibility (ADA) guidelines.
- d) Meet or exceed the minimum required parking standard for off-beach vehicular parking.
- e) Identify specific locations where off-beach paid parking access points are appropriate to fund operation & maintenance of amenities.

2. Signage and Wayfinding:

Consistent location, design, and message on signage at each access point, to notify the public:

- a. Consistent location and identification of the access points.
- b. Parking capacity.
- c. Where parking is allowed (and, in some cases, where it is not).
- d. Pedestrian path/walkover locations.
- e. Accessible/ADA access locations.
- f. General beach rules (what is allowed, what is prohibited, reference ordinances, who to call for wildlife, public safety).

3. Improvement of Access Points:

- a. Identify locations where access point amenities are appropriate (bathrooms, showers, off-beach parking areas).
- b. Identify parking control measures (bollards, sand fences).
- c. Consolidate and enhance off-beach parking and access point locations.
- d. Preserve and enhance access for the diversity of beach access users: recreational, fishing, surfing, kayaking, and ADA.
- e. Minimize on-beach vehicular access on eroding beaches.

4. Preservation of Natural Resources:

- a. Minimize impacts to natural resources where on-beach vehicular access/parking is provided.
- b. Utilize pervious surfaces where off-beach parking and amenities are provided.
- c. Minimize wind-blown sand from leaving the beach area with effective sand management.
- d. Encourage beach access roads and pathways to comply with GLO guidelines (width, angle and elevation).
- e. Promote dune walkovers and stabilized mats for pedestrian beach access pathways.
- f. Monitor beach access points and amenities to ensure compliance.

Access Point Review

Access Point 1 –
R.A. Apffel Park

AP-1: Apffel Park

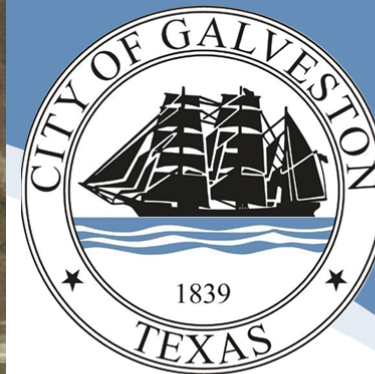

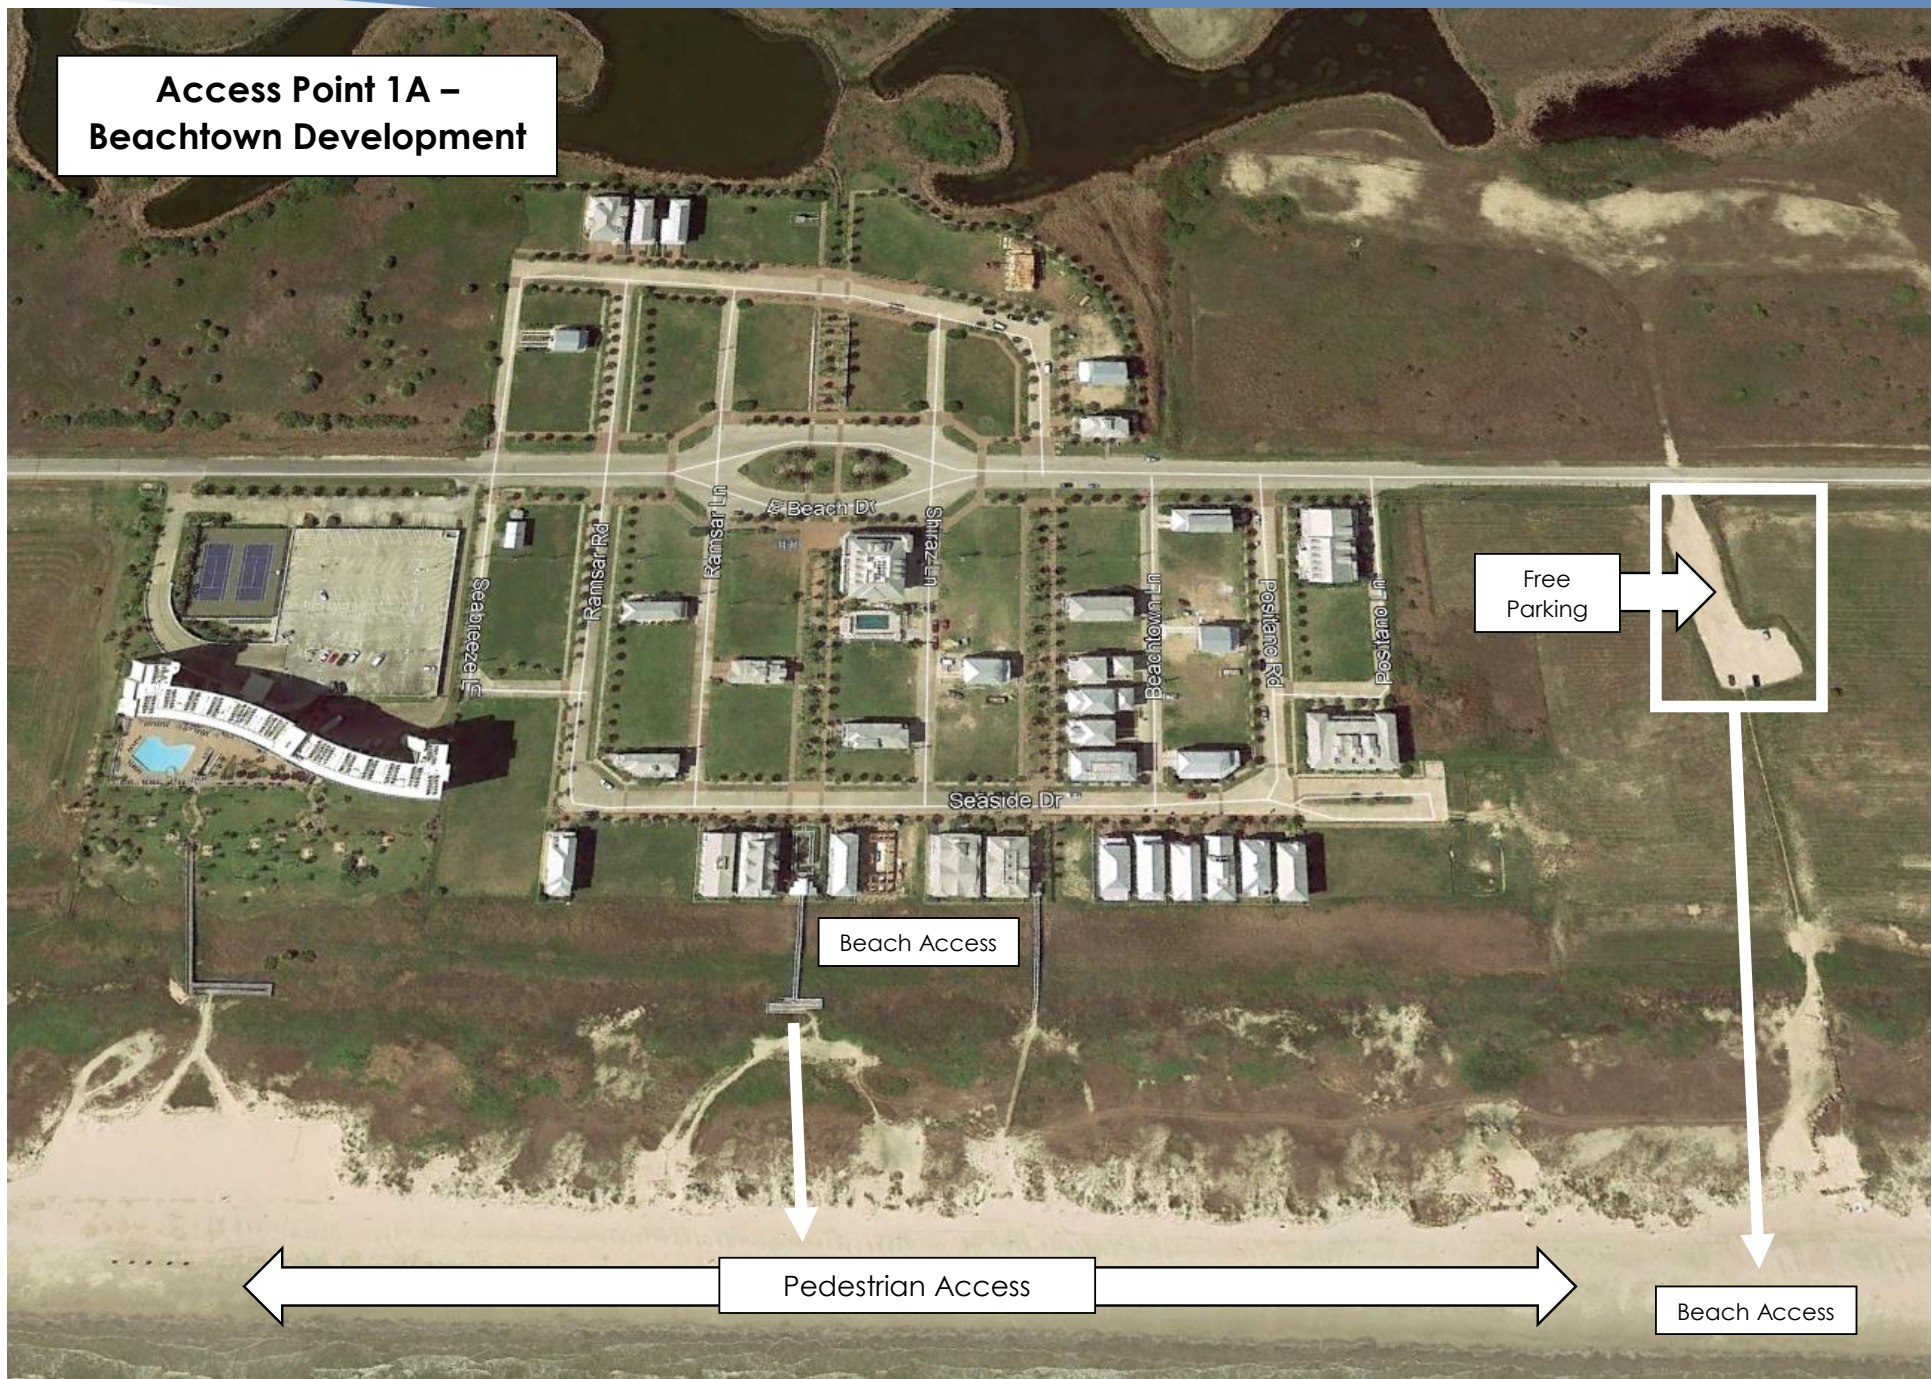

Guiding Principles	Conforms to Guiding Principles	Recommendations
Vehicular Access and Parking	Y	<ul style="list-style-type: none"> Meets GLO accessibility (ADA) guidelines; Meets GLO required parking standards; Study flooding that occurs throughout access point.
Signage and Wayfinding	Y	<ul style="list-style-type: none"> Conspicuous signage installed directing public to access point and parking area; Conspicuous signage installed at entrance listing general beach rules and contacts. Install uniform “branded” City Signage indicating Beach Access
Improvement of Access Point	N	<ul style="list-style-type: none"> Study flooding that occurs and impedes public access to beach and free parking area.
Restoration & Preservation of Natural Resources	Y	<ul style="list-style-type: none"> Impacts to natural resources are minimized by the use of pervious surfaces; bollards outline parking area to protect dunes and beach outside of parking area.
Special Comments		Can on-beach parking spaces count as credit toward overall CoG parking requirement?

**Access Point 1A –
Beachtown Development**

**Access Point 1A –
Beachtown Development**

AP-1(A): Beachtown

Guiding Principles	Conforms to Guiding Principles	Recommendations
Vehicular Access and Parking	N	<ul style="list-style-type: none"> Explore off-beach parking areas to accommodate beachgoers (on-beach parking located in East Village development that experiences consistent flooding); Study flooding that occurs and impedes public access to beach and free parking area. <i>Study flooding that occurs and impedes public access to the beach and free parking at East Beach free parking entrance.</i>
Signage and Wayfinding	N	<ul style="list-style-type: none"> Add conspicuous “City of Galveston”-branded and list general beach rules; Add signage to identify ADA-designated parking. Current signs are not easily observed and undersized.
Improvement of Access Point	Y	<ul style="list-style-type: none"> Accreting beach with two dedicated ADA dune walkovers; Dune walkovers need to be monitored as this is an accreting beach and the walkovers may need to be extended to meet growing LOV.
Restoration & Preservation of Natural Resources	Y	<ul style="list-style-type: none"> Impacts to natural resources are minimized by use of off-beach parking area; use of pervious surfaces; practices effective sand management.
Special Comments		

AP-1(B): Palisade Palms

Guiding Principles	Conforms to Guiding Principles	Recommendations
Vehicular Access and Parking	Y	<ul style="list-style-type: none">• Parking spaces exceed required amount;• provides ADA access.
Signage and Wayfinding	N	<ul style="list-style-type: none">• Add conspicuous “City of Galveston”-branded signage that is needed to direct beachgoers to public beach parking area and list general beach rules;• Add signage to identify ADA-designated parking;• Current signs are not easily observed and undersized.
Improvement of Access Point	Y	<ul style="list-style-type: none">• ADA dune walkover provided;• Dune walkover needs to be observed as this is an accreting beach and the walkovers will need to be extended to meet growing LOV and comply with GLO requirements.
Restoration & Preservation of Natural Resources	Y	<ul style="list-style-type: none">• Parking area ensures impacts to natural resources are minimized;• minimizes use of impervious surfaces;• practices effective sand management.
Special Comments		

**Access Point 1C –
West of Islander Beach
(Grand Beach Area)**

AP-1(C): West of the Islander East (Grand Beach Area)

Guiding Principles	Conforms to Guiding Principles	Recommendations
Vehicular Access and Parking	Y	<ul style="list-style-type: none"> • ADA access is provided from parking area to the beach; • meets the minimum required parking standards for off-beach vehicular parking; • minimizes traffic and safety hazards on neighborhood streets by providing off-beach parking area.
Signage and Wayfinding	N	<ul style="list-style-type: none"> • Add conspicuous “City of Galveston”-branded signage and list general beach rules; • Add signage to identify ADA-designated parking; • Current signs are not easily observed and undersized.
Improvement of Access Point	N	<ul style="list-style-type: none"> • Recognize portion of this area as <i>Access Point 1-D: Preserve at Grand Beach</i>, which is a gated subdivision; • Access only available through entrance at Stewart Beach (ADA access is free).
Restoration & Preservation of Natural Resources	Y	<ul style="list-style-type: none"> • Parking area ensures impacts to natural resources are minimized; • minimizes use of impervious surfaces; • practices effective sand management.
Special Comments		<p>Recommend relocating the bollard line to the west of the dune walkover at AP-1(C) for the area of beach where an equal or greater degree of public beach access is provided by the adjacent development.</p>

Access Point 2 – Stewart Beach

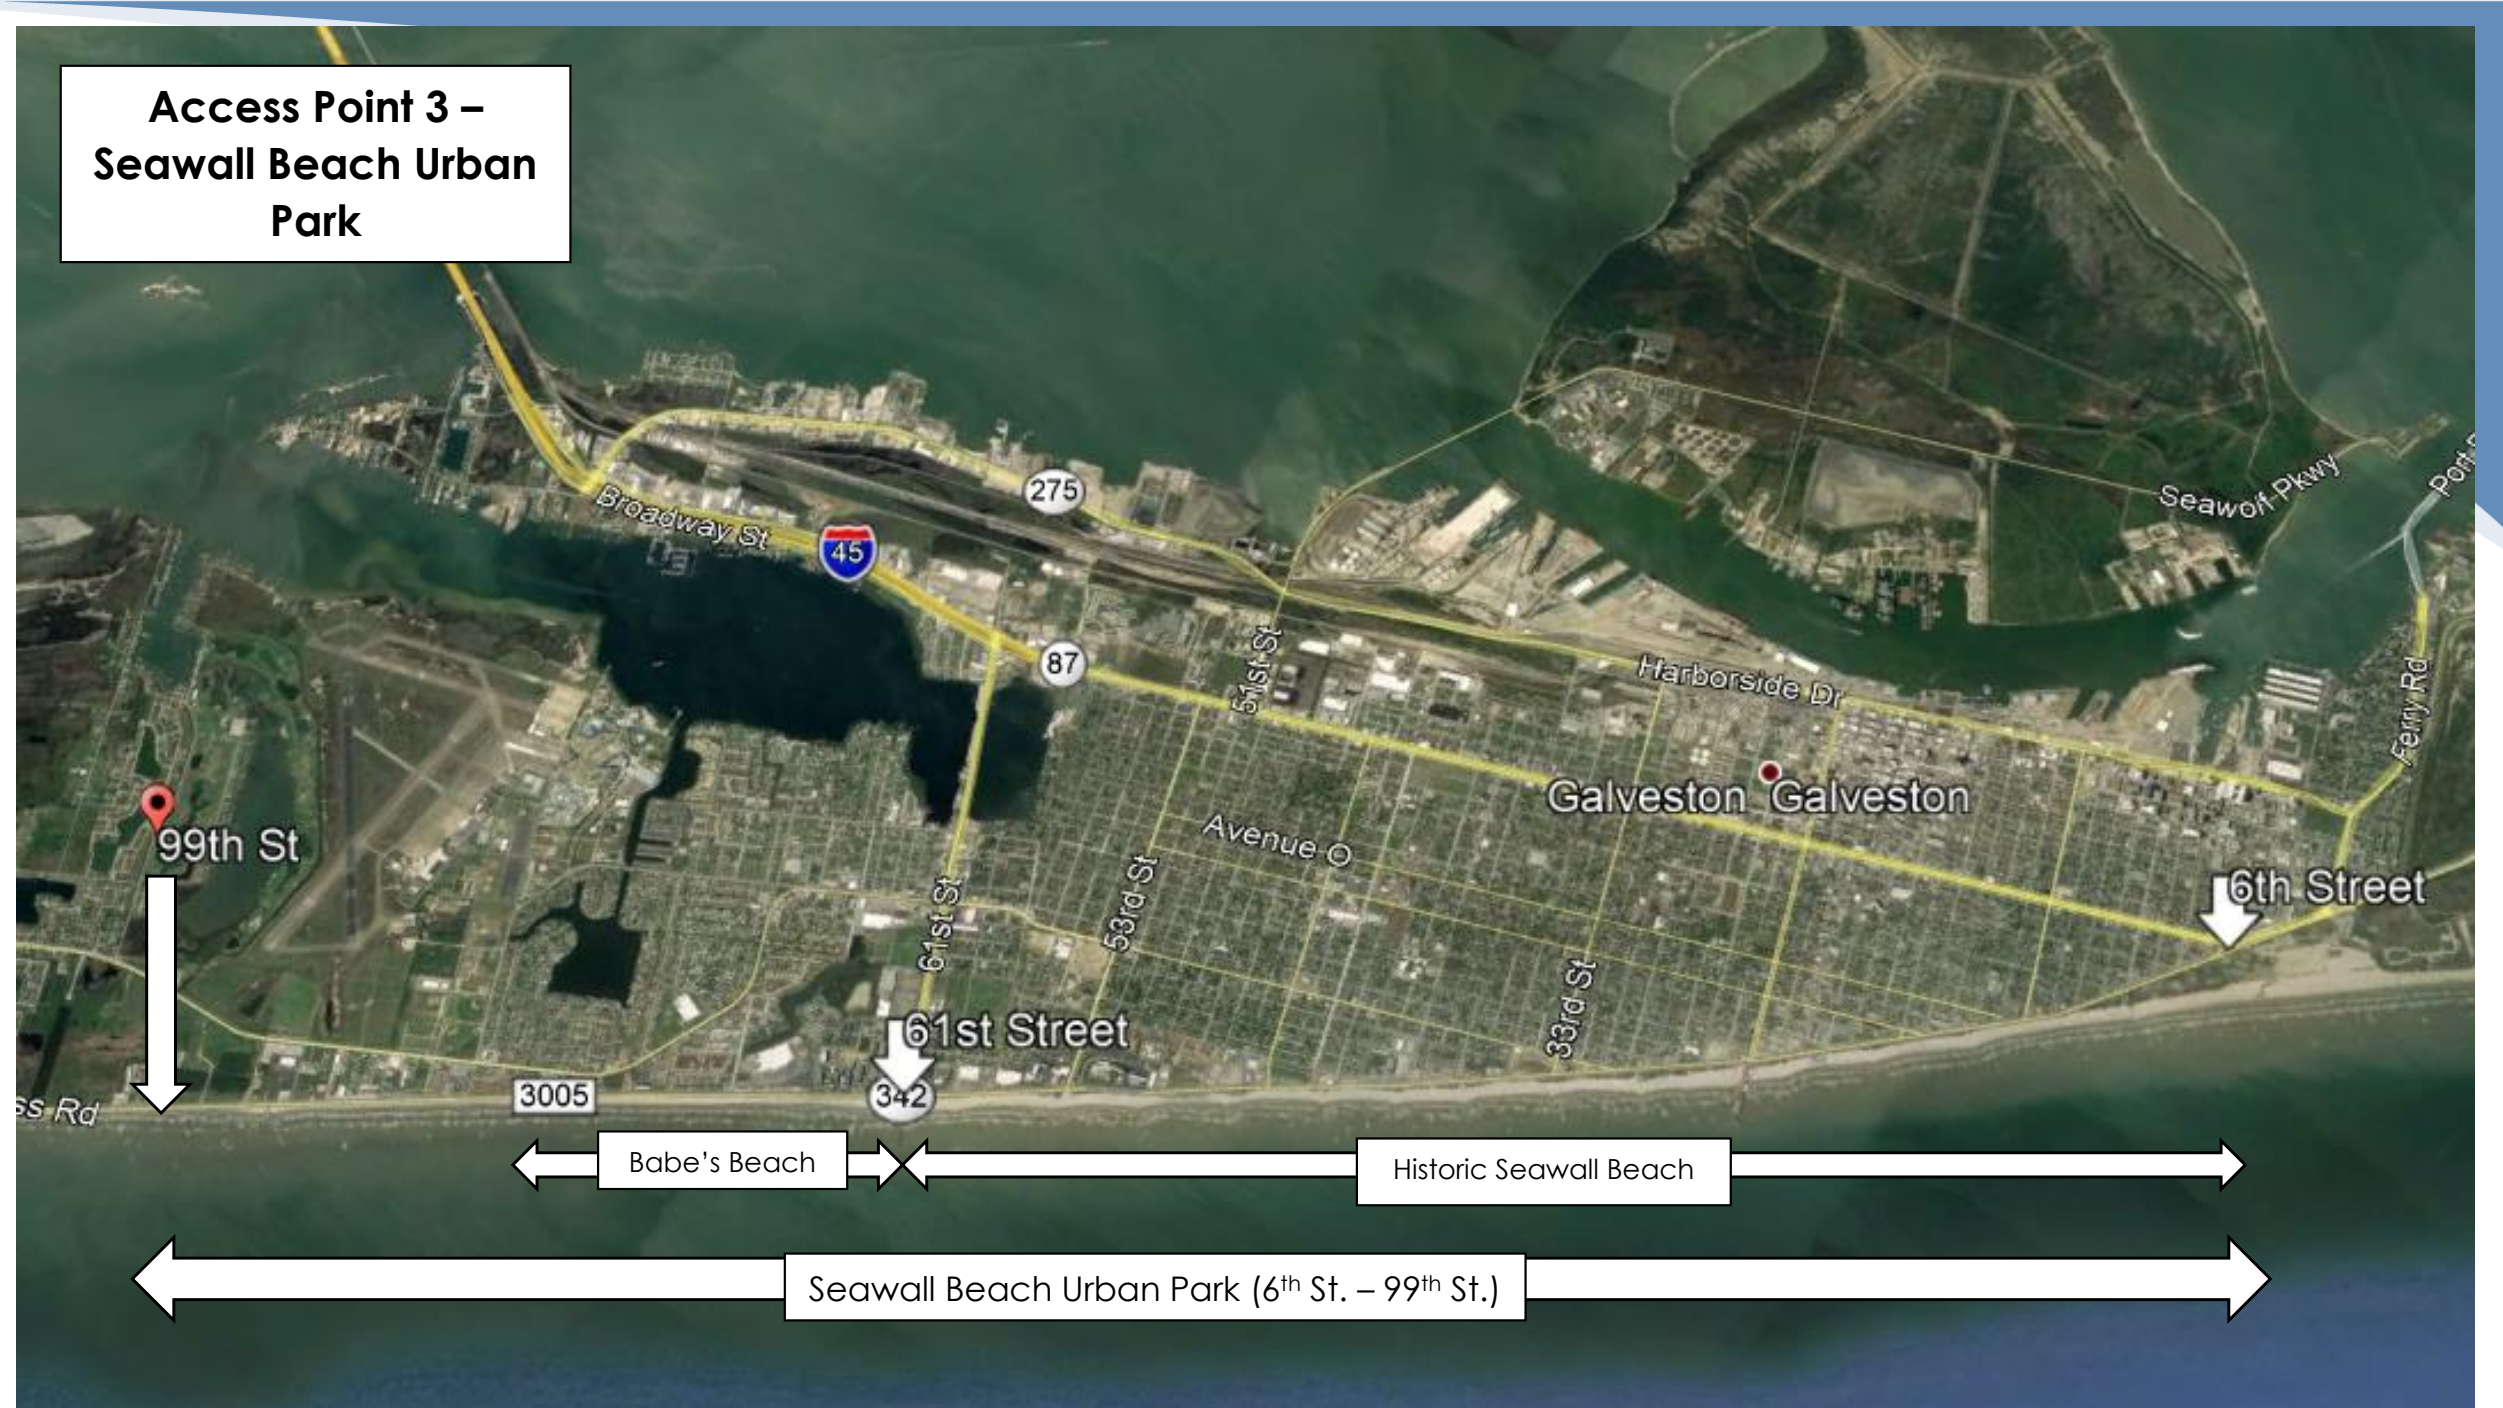

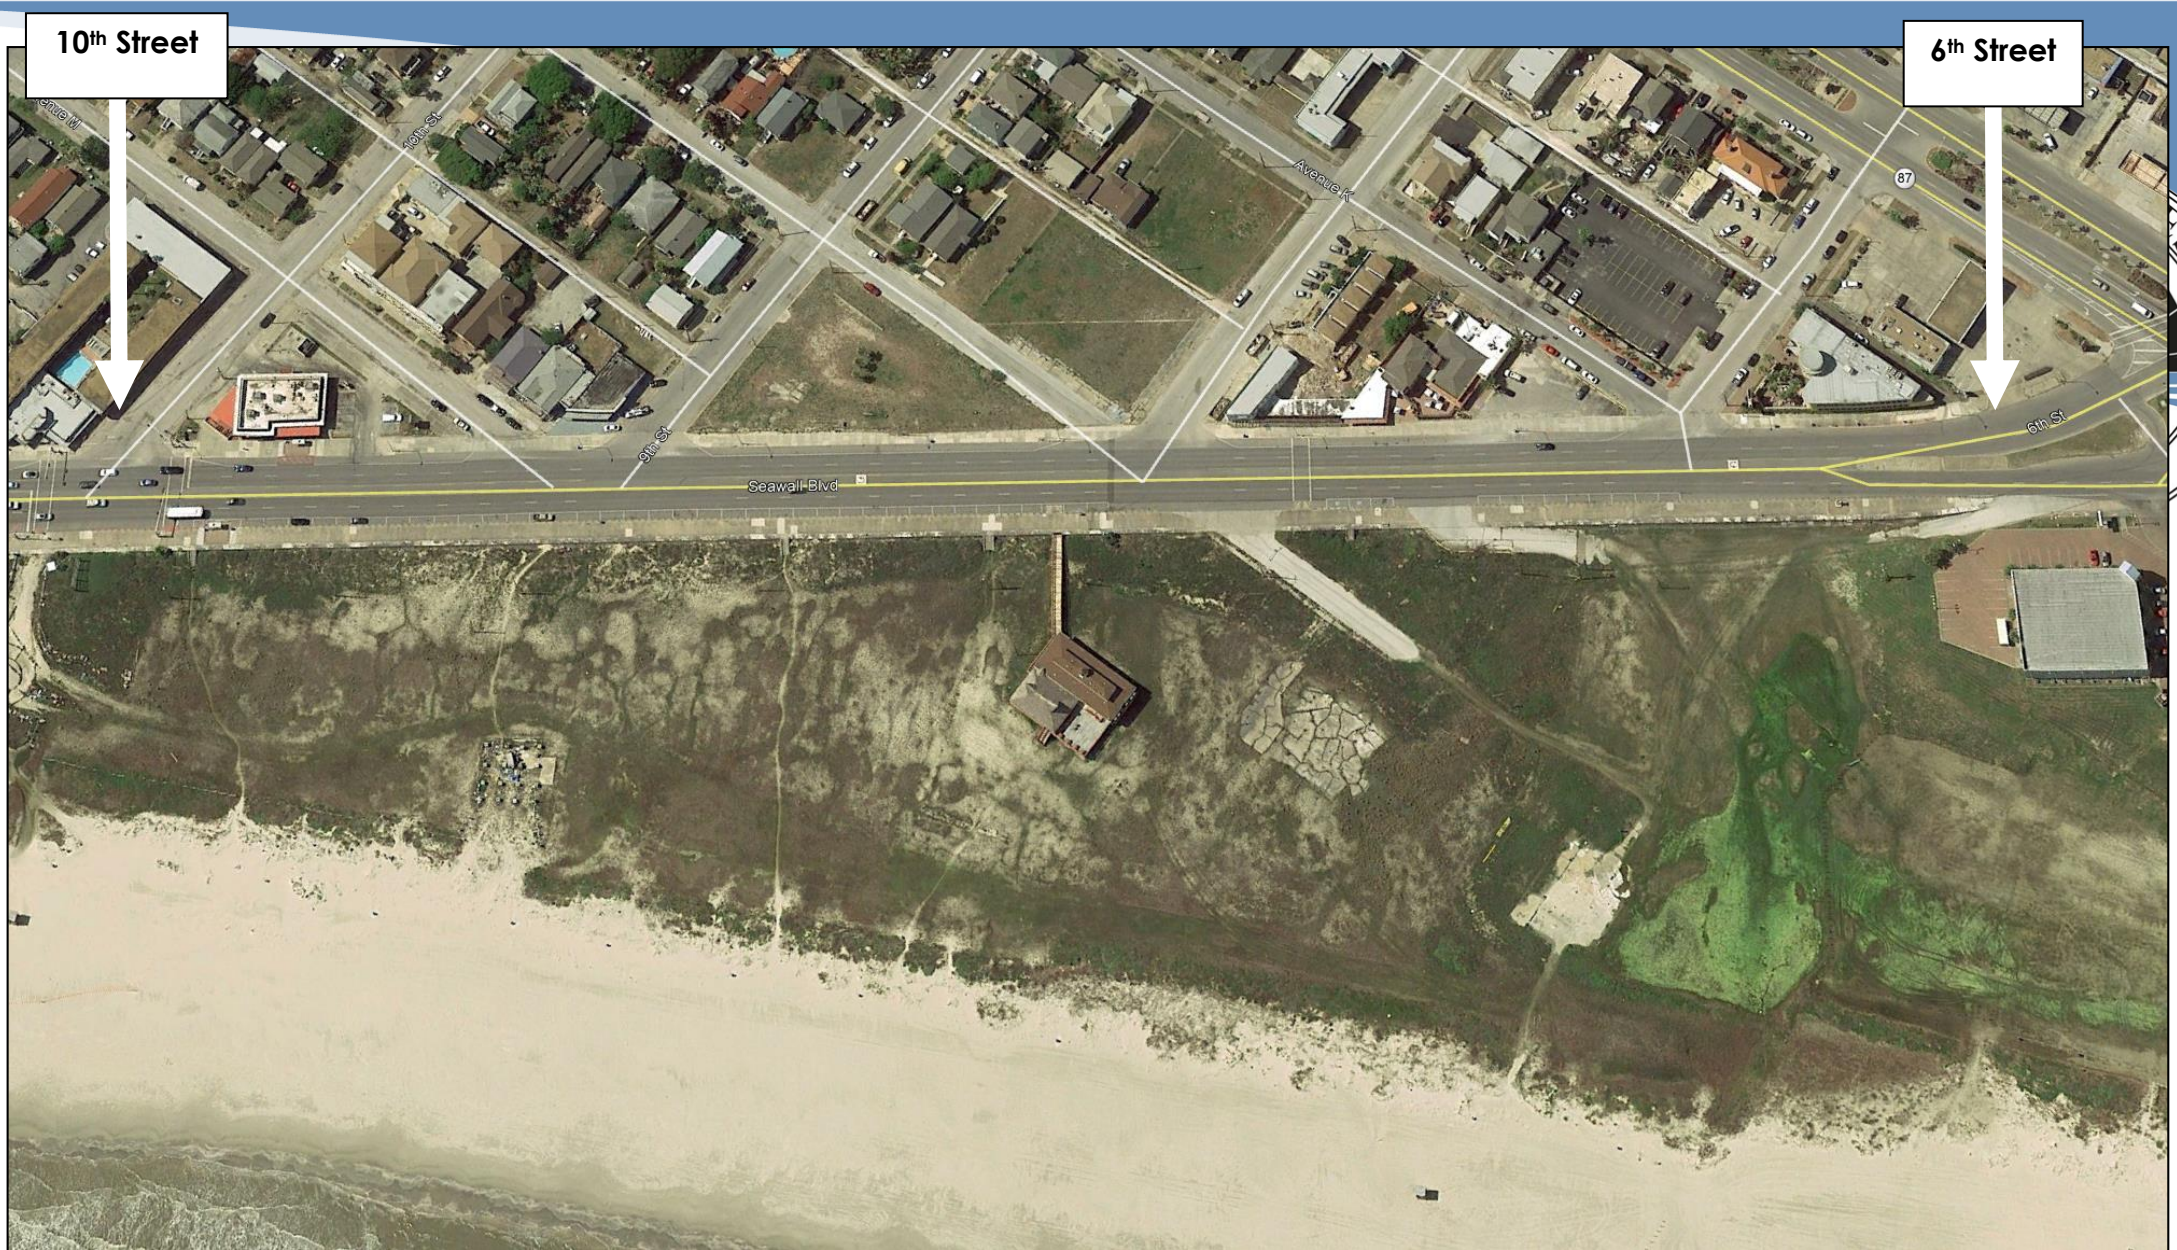

AP-2: Stewart Beach

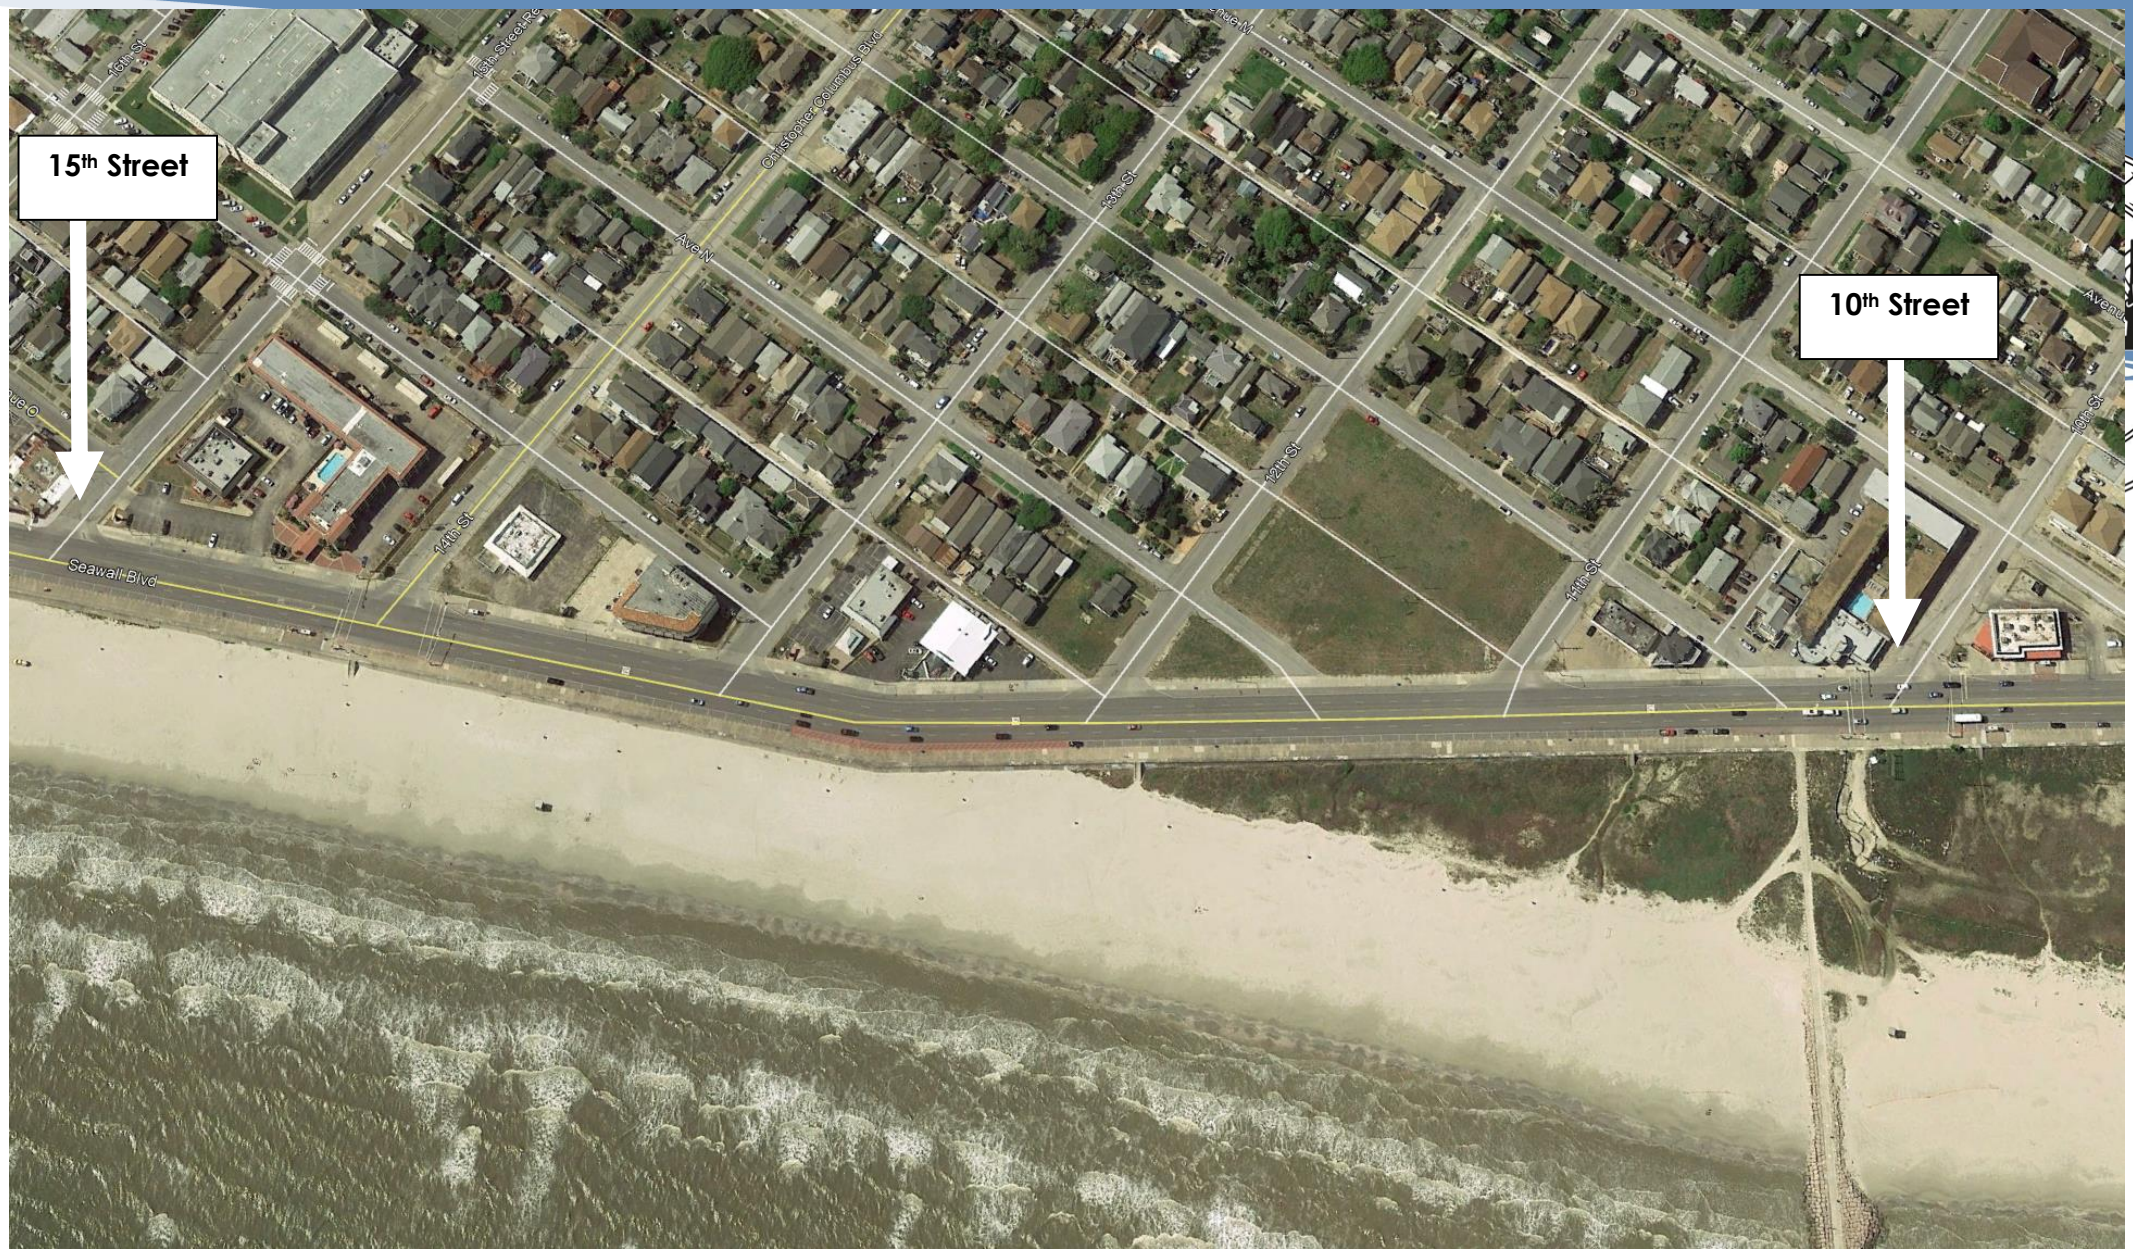

Guiding Principles	Conforms to Guiding Principles	Recommendations
Vehicular Access and Parking	Y	<ul style="list-style-type: none"> On-beach parking provides ADA accessibility and ample parking spaces.
Signage and Wayfinding	Y	<ul style="list-style-type: none"> Add conspicuous signage to free parking area; location of access point, public parking and beach rules are visibly marked; on-beach parking provides ADA access.
Improvement of Access Point	Y	<ul style="list-style-type: none"> Investigate drainage - parking and beach area continuously flood; access point amenities are provided; ADA accessible; preserves and enhances access for the diversity of beach access users.
Restoration & Preservation of Natural Resources	Y	<ul style="list-style-type: none"> Parking areas ensure impacts to natural resources are minimized; minimizes use of impervious surfaces; practices effective sand management.

80th Street

80th-85th Street

This aerial map shows the coastal area between 85th and 90th Streets in Astoria, Oregon. The coastline is visible at the bottom, with waves breaking onto a sandy beach. A major road, likely Highway 30, runs horizontally across the middle of the image. To the north of this road, there are several large parking lots and industrial or commercial buildings. One large building with a white roof is prominent on the left. Another building with a red roof is visible in the center. The area is bounded by 90th Street to the north and 85th Street to the south. The map is labeled with '90th Street' at the top, '85th Street' at the bottom, and '85th-90th Street' along the coastline. A small label '3005' is visible on the right side of the map.

Special Comments		<ul style="list-style-type: none"> • Recommend Council have discussion with GPD, Park Board/Beach Patrol, land owner, County, GLO, State Representative(s), and adjacent POAs on long-term strategies. • Goals of discussion is improving safety, beach access, and uses of the beach.

Comment Card Responses

Beach Access Q&A

01.24.19

(Each slide is an individual comment.)

AP: 1B-35

- Better signage for free parking areas – Apffel / Stewart (Conspicuous)
- AP: 1B – Signage & safe access path for pedestrians
- Access 13 – either repair or remove from access rolls neighboring Access 14 current serving as access to beach in this area.
- AP: 13 – rehab 13-Mile Road for better vehicular access.
- AP: 15A-C – Better signage in neighborhood directing to access points (walkovers).
- AP: 15 – This site needs constant sand maintenance at entrance during dry seasons.
- AP: 19 – Better neighborhood signage to paths. Walkovers should be built to protect dunes / wetlands.
- AP: 20 – same as 19 – no clear signage of where path / walkover is located.
- AP: 23 / AP: 24 – Ditto
- AP: 19 & 20 - Spoke w/ Rhonda and like the idea of moving access points from neighborhoods (especially those w/o designated paths / walkovers). Also like the creation of uniform parking / signage, etc.
- AP: 29 – Public parking area on N. side of 3005 – better signage and pedestrian light to cross 3005 needed.
- AP: 32 – Pocket Park 4 – What is the plan for this? Could be great for access.
- AP: 40 – Something needs to be done to keep people from crating paths through dunes (ex- w of walkover).
- AP: 37, 38, 39 – Walkovers need to be extended to beach.
- AP: 34, 35 – Ensure entryway is maintained to allow access after rain.

AP: 1B – Palisade Palms

- Can Access Point 1B allow vehicular traffic?
- Or anywhere in the middle of East Beach to service the beach?

AP: 3 – Seawall Urban Park & AP:11 – Spanish Grant

- Free parking on the seawall will alleviate the burden of too many tourists in the Spanish Grant neighborhood.
- Remove sign on 3005 for access points that are not active.

AP: 4 – End of Seawall

- As a board member and officer of the Diamond Beach Condominium Homeowners' Association, I am writing to request that the Galveston city administration consider solutions to rectify a serious safety issue regarding beach accessibility at the far west end of the Seawall. This location has a city parking lot that does a great job of serving beachgoers and fishermen. The problem is the continuously eroding path from the parking lot to the beach. This area also provides the primary beach access point for Diamond Beach and the many condominiums and apartments immediately across Seawall Boulevard. Our owners and guests use this path to avoid disturbing the sand dunes.
- It is our understanding that the City of Galveston is responsible for safe beach access. As the attached pictures show, the unsafe beach access path from that city lot is narrow, steep, rocky, eroding, and extremely dangerous. Visitors find this path to be dangerous, while vacation rental reviews point out the hazard with negative comments. Small children and even adults with no physical handicaps have fallen down this slope. We recently watched a young mother pick up her toddler to traverse the steep path, and then fall with baby-in-arms. Over-confident bicyclists have taken serious tumbles. Some have fallen into rock piles immediately adjacent to the path. The path is totally unusable for anyone with even minor physical handicaps. We are not aware of any serious injuries requiring emergency medical treatment, but the hazard level is clear, and liability risk for inaction is substantial.
- Over the past three years, Diamond Beach's HOA president (James Fuglaar), general manager (Charles Lemons) and I have had several meetings at the site with senior Galveston Park Board administrators and trustees, as well as Galveston City and County Engineers. Anyone that observes this location agrees instantly that something needs to be done, but there seem to be issues with overlapping jurisdiction, in that the Galveston Park Board, city & county governments and the Corps of engineers seem to have responsibilities relevant to this matter. Furthermore, the current pathway lies near a property boundary and may belong to IBC bank. To date, absolutely nothing has been done. During a recent visit to the site with members of the Park Board, several alternatives were considered, but most reasonable solutions appear to include options that overlap government responsibilities. During these discussions, we were made aware that the city's long-term plan includes a handicap-accessible walkover from the end of the seawall down to the beach. Such a structure would provide ideal safe beach access for Galveston beachgoers parking in the city lot at the end of the seawall, as well as for owners and renters staying at Diamond Beach and nearby condos, yet avoid any concerns regarding city work on private property
- The city has done a terrific job of beautifying the Seawall. Furthermore, we at Diamond Beach are extremely supportive of ongoing efforts on the part of the city, the park board, and the GLO to renew beaches and build protective dunes to limit flooding during high tide events. We sincerely hope that the city will address this beach access problem at the west end of the Seawall. Mr. Lemons and I would be happy to host a site visit so that concerned city council members can see this problem for themselves.

AP: 6 – Pocket Park #1

- More signs please about dogs on leash and cleaning up after your dog.
- Love this access.

AP: 6 – Pocket Park #1

- I like the idea of the angled access to avoid run-off issues.
- Please include a statement on the guiding principles.
- For Access Point 6, I would recommend acquiring the Henderson property & Moody property on each side and expanding access there.
- Love the guiding principles, but I would recommend including a statement regarding financial sustainability and easing the burden of maintaining the beach open off the local community.

AP: 11 – Spanish Grant

- Please bear with me as I share our thoughts.
 - 1. Vehicle Access and parking- DO NO HARM TO SUBDIVISIONS where the property owners the taxpayers lose their quality of life.
 - Parking in particular in our subdivision is convenient and free to those who do not want to pay or have to follow city ordinances (leash law, glass containers, fireworks, golf carts, etc.) by the time the nonemergency number contact arrives- if they can arrive, the frustration for property owners is at a high level.
 - Then take into account those who trespass and picnic and use taxpayers property and showers for free!
 - In SG Beach the reserve/buyout property has become the only dune due to rapid erosion. We are in desperate need of dune renourishment and have requested help in the past from Dustin Henry but still don't know what would be in compliance with the many government levels of bureaucracy.
 - Please consider the consolidation and subsequent removal of ADA signage where it is literally No ADA access. Please make the appropriate accommodations at free parking pocket parks. This could be accomplished by re-opening the areas also jointly owned (we were told) by Galveston County.
 - Free parking is the key - it is a joke to say that the fees are truly improving the ability of the average family to enjoy Texas Beaches and especially what is happening in Galveston.
 - Painted trashcans on the seawall while our roads are covered with dirty diapers, clothing, and just about any kind of litter left by the free parking people, you can imagine is a slap in the face to those of us paying the extremely high property taxes.
 - I do believe there is too much consideration given to the developer/member of this committee to protect his investments on several subdivisions with no real concern for those property owners who have no selfish investment agenda other than their individual home for their family.
 - In summary, the Park Board has maintained they have no duty to subdivisions where free beach parking is available. I suggest they either be abolished or take on the true intent of the General Land Office mandates.

AP: 15 – Pirates Beach & AP: 41 Pointe San Luis #4

- I believe: All West End beach access points that sit inside a subdivision should be closed.
- The San Luis Pass beach area, currently a free-for-all, should be developed into a master-planned beach area for visitors with amenities, gates (user fees!) and “control” of the many visitors.
- A plus is that with a more “planned” and “controlled” area, lifeguards can plan for adequate patrols which will help prevent drownings at San Luis Pass.
- THINK BIG!

AP: 18 – 16-Mile Road

- Want to make sure that the bollards on the west side of the public beach parking doesn't move farther west in front of the homes in Gulf Palms.
- If move room for parking is needed – move bollards east as there is only 1 house east of access point 18.
- Would rather see the parking area stay the same, no larger.

AP:23 – Dunes of West Beach

- I previously lived on the Gulf Coast of Florida and was pleased with the access and parking for their beaches. You paid for parking and use of the amenities.
- There was no parking or driving on the beach. We were happy to use and pay for parking in their lots because the beaches were kept natural.
- I am currently a homeowner at the Dunes of West Beach and on behalf of the Homeowners Association, we do not support parking or driving on the beach.
- Any parking lots built need to be in areas not to diminish the value of our homes.

AP:23 – Dunes of West Beach

- On behalf of the Board of Directors of The Dunes of West Beach Community Services Association, Inc. representing 35 property owners, I would like make clear that we are unanimous in our opposition to the construction of any public walkovers or mats for beach access in our subdivision and we will not financially support any portion of such construction.
- In addition, should the City of Galveston consider the construction of any walkovers or mats, we ask that the City meet with us to ensure that appropriate property protection measures are in place, including insurance, signage, vehicle parking control, maintenance and overall security.
- As a practical matter, Dunes homeowners have no need of public walkovers since essentially all of the homeowners have already paid for and built walkovers to the beach. In addition, the Holiday Inn Galveston Seaside Resort immediately adjacent to the Dunes already has a public walkover to the beach along with public parking and restroom facilities that are lightly used.
- Additionally, we feel that the most cost-efficient, user-friendly, and safe beach access plan for Galveston's west end visitors would consist of the existing pocket parks – many of which are underutilized - and possible new parks in the San Luis area, which may also provide a new revenue stream for the City.

AP: 34 – Miramar Subdivision & AP: 35 – Half Moon Beach & Stavanger Beach

- Unfortunately, I work in Canada and am unable to attend the meeting planned for November 7th, to provide verbal input on the beach access plan. Therefore, I hereby provide that input in writing and trust it will add some value.
- Firstly, I wish to make it clear that despite being a homeowner on this stretch of beach, I totally agree and accept the position that I have no more right to beach access than any other Texan or visitor to the area. However, I contend that this access should be on the same basis for all, as I will explain.
- It should be apparent that this length of beach is completely built out from a residential perspective and has a bustling RV park running parallel to it across the road. Consequently, the beach is very popular with residents and visitors alike, with many of the users being young children. It would not be an exaggeration to conclude that this beach has considerably more younger users than several less built out beaches that have pedestrian only status. Vehicles are an obvious hazard to children, who are often oblivious to their surroundings while playing happily. This is especially the case with many drivers treating the beach as a less policed highway.
- When my wife (age 59) and I (age 62) visit our home on the beach, often with guests, we park on our lot and then walk several hundred feet to the beach, carrying everything that we need to take. I contend then that it is only equitable that other beach users do the same, with their vehicles always parked in one of the access areas, which provide ample space. This would then keep the busy beach completely free from vehicles which are a danger to people and a hazard to wildlife. In closing, I respectfully request that the committee grants this stretch of beach, year round, pedestrian only status.

AP: 39 – Pointe San Luis #2

- We are extending the walkover #39 extending to the beach.

AP: 38 - 41

- These points are poorly maintained & frequently under water from rains & for high tides.
- To get to the beach requires walking through high water. Maintenance of pier is average but timbers show wood rot.
- Access 41 is typically flooded and to get to beach by vehicle notes frequent vehicles stuck, requiring to be towed.
- While on beach, frequent vehicle cutting donuts & destroying the beach.
- Poorly patrolled & trash not picked up for extended periods.

AP: 39 – Pointe San Luis #2

- The public access point on the east side of Pointe West have the public boardwalk that should extend past the wetlands area & to the beach.
- The boardwalk needs to be extended to the beach.
- It currently ends about ½ way through the wetland area causing people to walk through the marsh grass to get to the beach.

General Comment

- I have been working & doing shorebird monitoring in Galveston since 2012 and I have observed fewer shorebirds, such as Piping Plovers, using stretches of beach where beach access points are frequent and closer together, and more birds use the beach where access points are further apart and fewer.
- My comment, based on my research & monitoring findings, would be not to increase the number of beach access points in an effort to conserve and protect the available beach left for the shorebirds.

General Comment

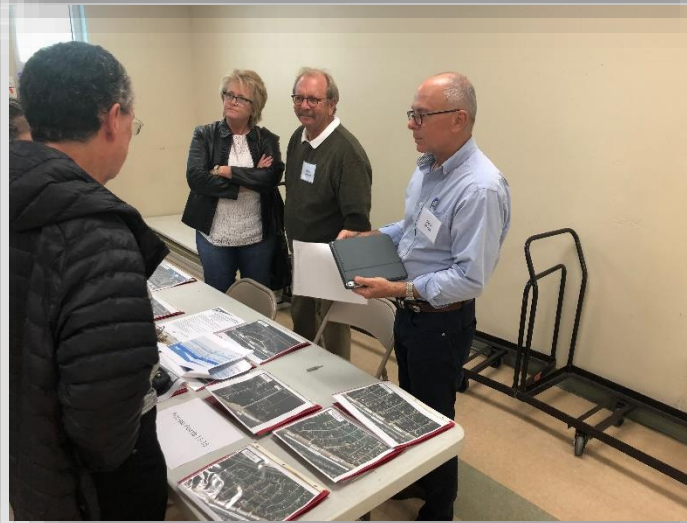

- Vehicle driving and parking on beach between access points prohibited year round unless
 - Required for disable access
 - Actively used to clean & care for beach, i.e. trash pickup and beach sweepers.
- Better signage at beach access points with essential guidelines of do's and don'ts.
- No signage in dune protection areas.

General Comment

- Use a carrot and stick to attract tourist to preferential parking areas:
 - DO NOT!
 - Give parking stickers to beach residents nor bay residents under a common HOA.
 - You will drive a wedge into the HOA's that characterize the west end communities.
 - DO NOT:
 - Limit current beach access in the neighborhoods to a degree that young and old cannot help but drive on Seawall or 3005 in golf carts to get to the beach. The first accident and their parents will owe the City when the trial is over.

Congratulations!
The first access point review is complete!
Nice work!
